

1. Download setup file from "Get Demo" link

The screenshot shows a web browser window at www.vcharting.com/buysellsignal.php. The website features a dark header with the Vcharting logo and navigation links: HOME, PRODUCTS, SERVICES, BLOG, DOWNLOAD, CONTACT US, BUY, and MEMBER AREA. A disclaimer at the top states, "ABOVE PRICES ARE INCLUSIVE OF MT4 DATA FEED."

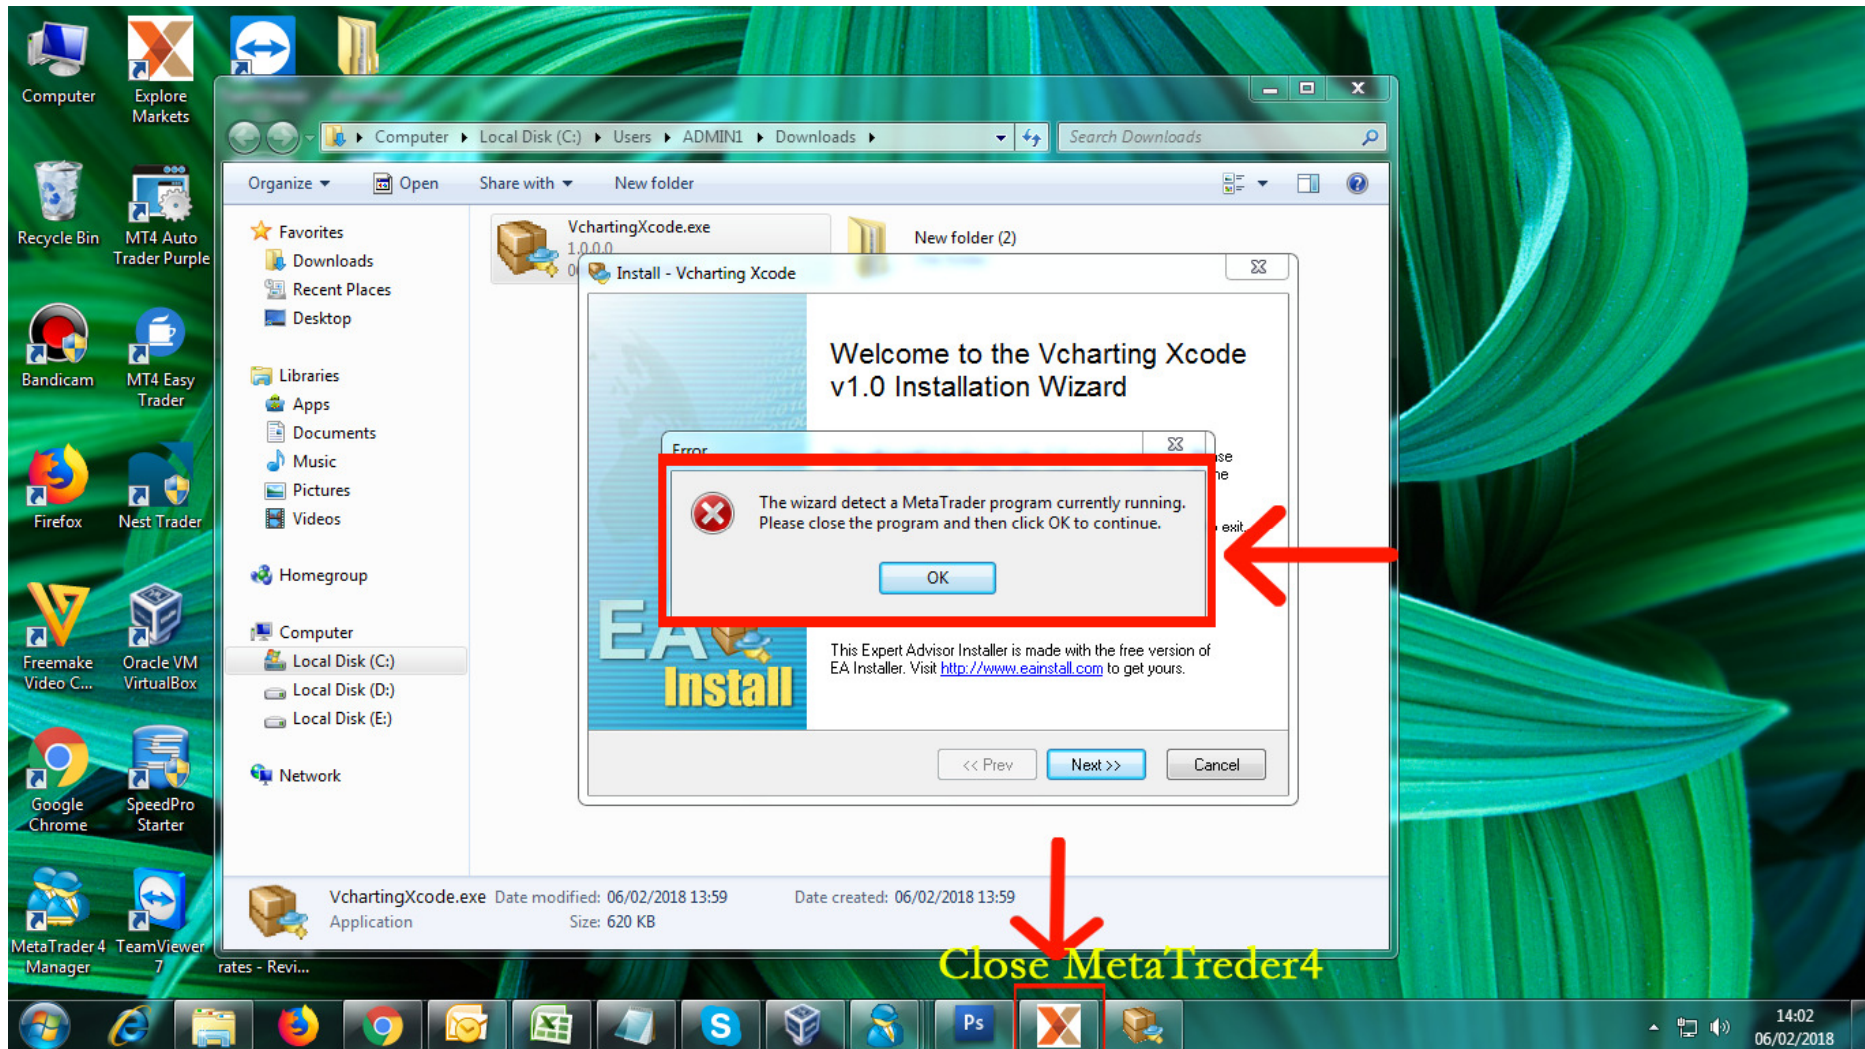

The main content area displays a candlestick chart on the left with a green line indicating a buy signal. To the right of the chart is a section titled "VCHARTING X-CODE" with the claim "OUR SOFTWARE HAS MORE THAN 80% ACCURACY ON DAILY BASIS". Below this, four bullet points list features: "For Commodity Intraday Traders", "Works With Only 5 mins Timeframe", "Gives Target and Stoploss", and "Maximum 2 - 4 calls in a day".

Below the features, there are four pricing options: Monthly (INR 1,900), Quarterly (INR 5,150), Half-yearly (INR 9,500), and Yearly (INR 17,100). A disclaimer below the prices states, "ABOVE PRICES ARE INCLUSIVE OF MT4 DATA FEED."

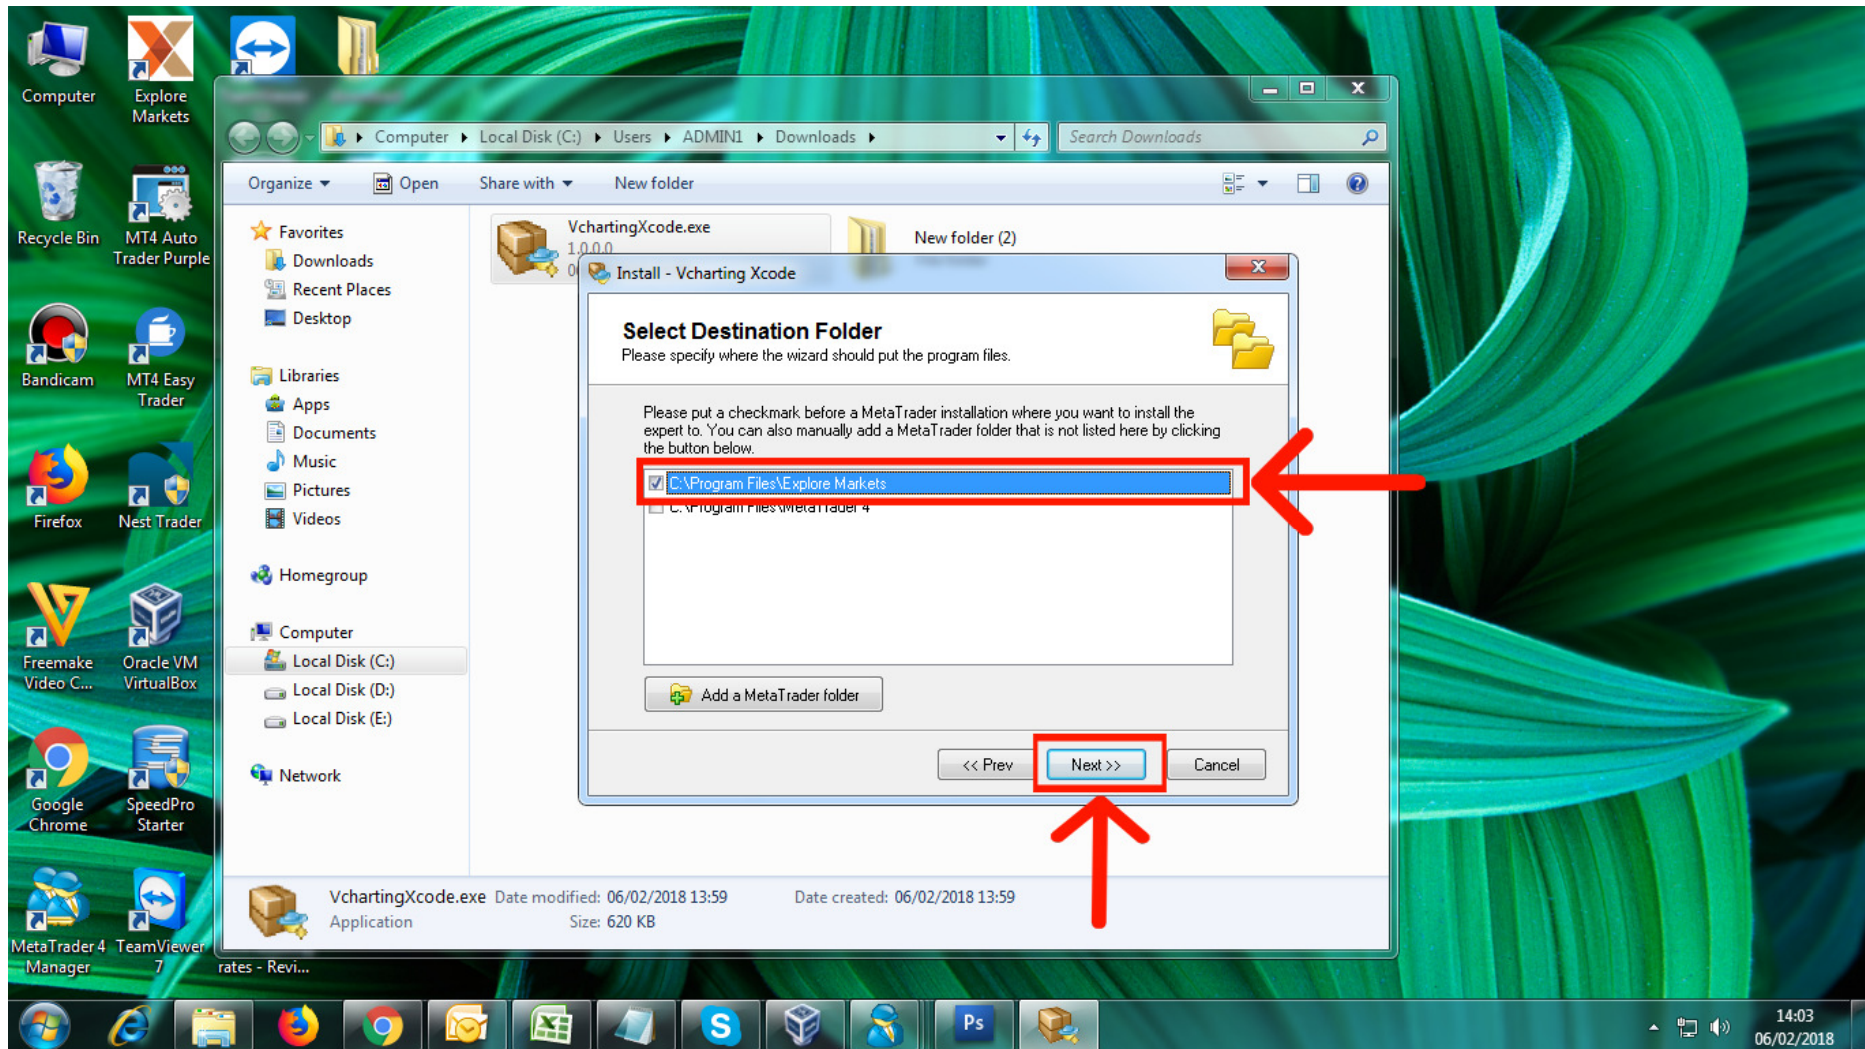

A red box highlights the "Get Demo" button, which is located below the chart. A red arrow points from this button to the Windows taskbar at the bottom of the screen. In the taskbar, a red box highlights the "VchartingXcode.exe" application, which is shown as a download icon with the file size "247/620 KB" and "7 secs left". Another red arrow points from this taskbar icon to the Windows taskbar itself.

The Windows taskbar at the bottom shows various application icons, including Internet Explorer, Google Chrome, and Microsoft Word. The system clock in the bottom right corner displays the time "13:59" and the date "06/02/2018".

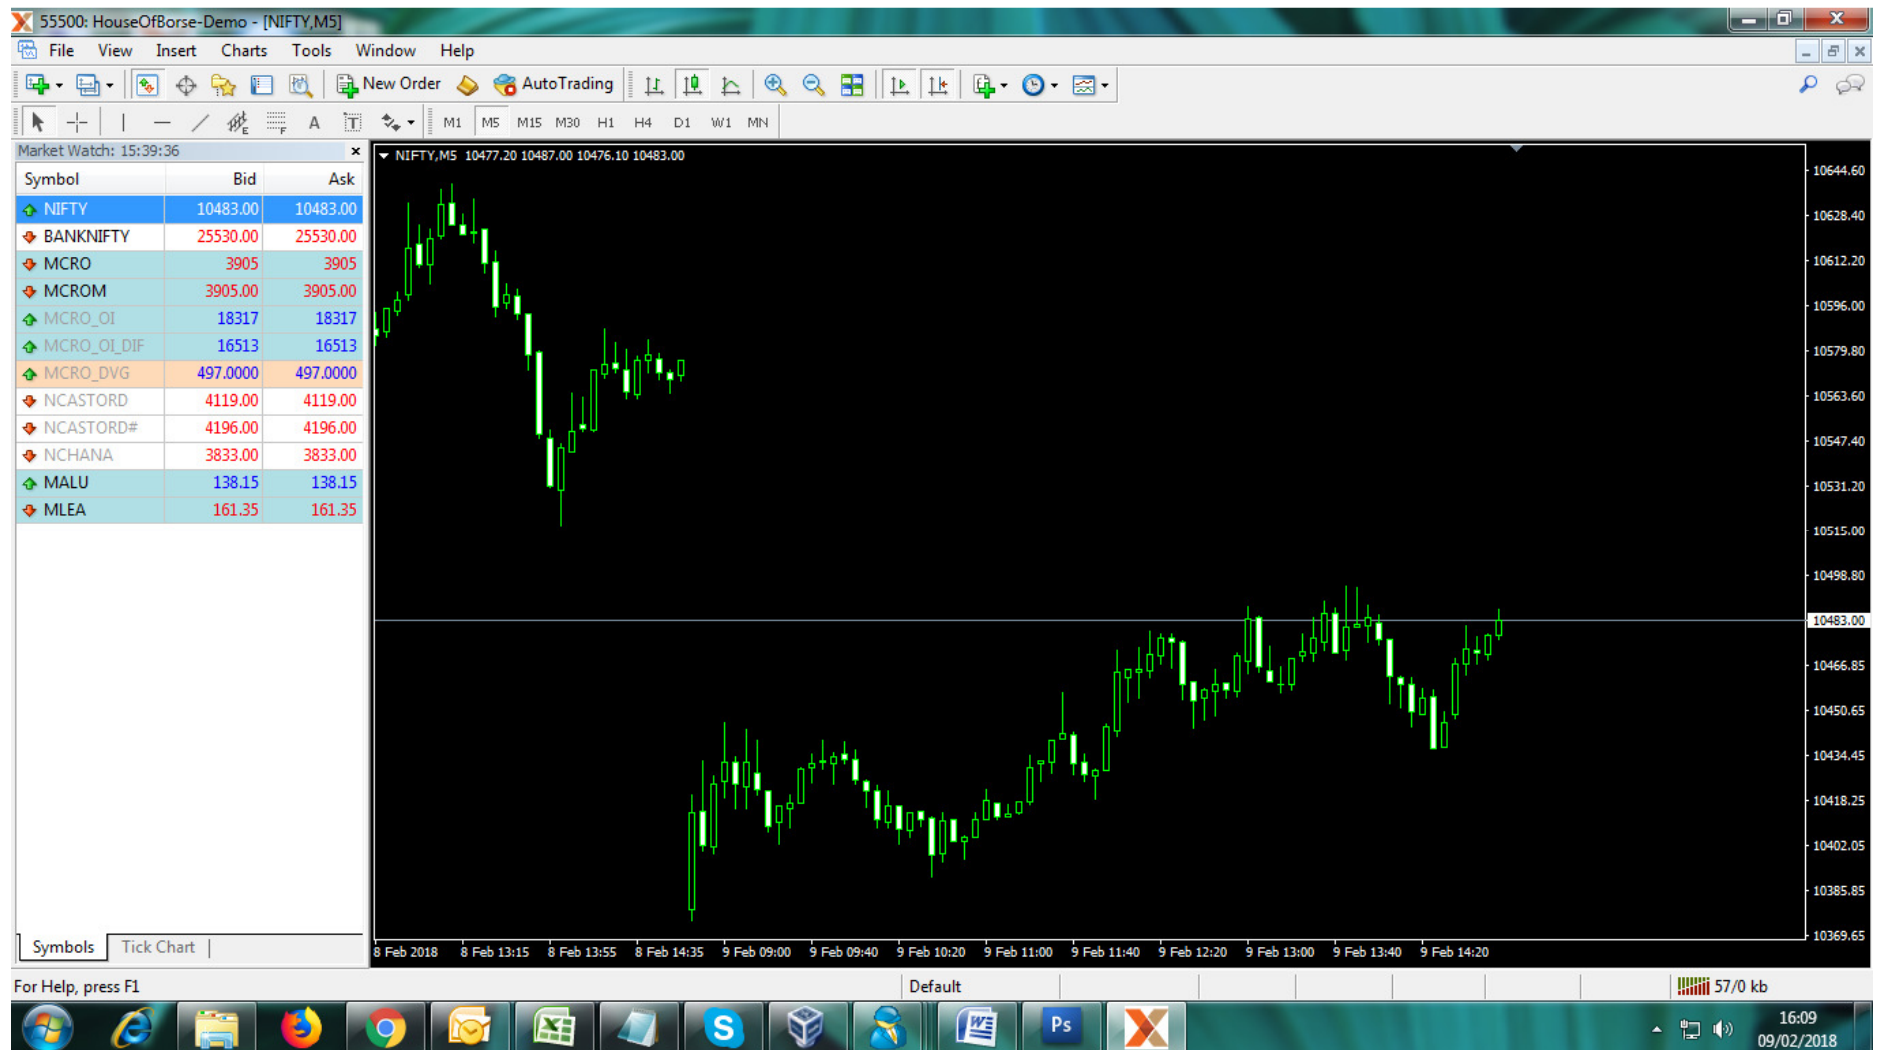

2. An exe file will be downloaded. Run and install this exe file. If any Metatrader4 is open, this exe file will not run. So close any open MT4 and then run exe.

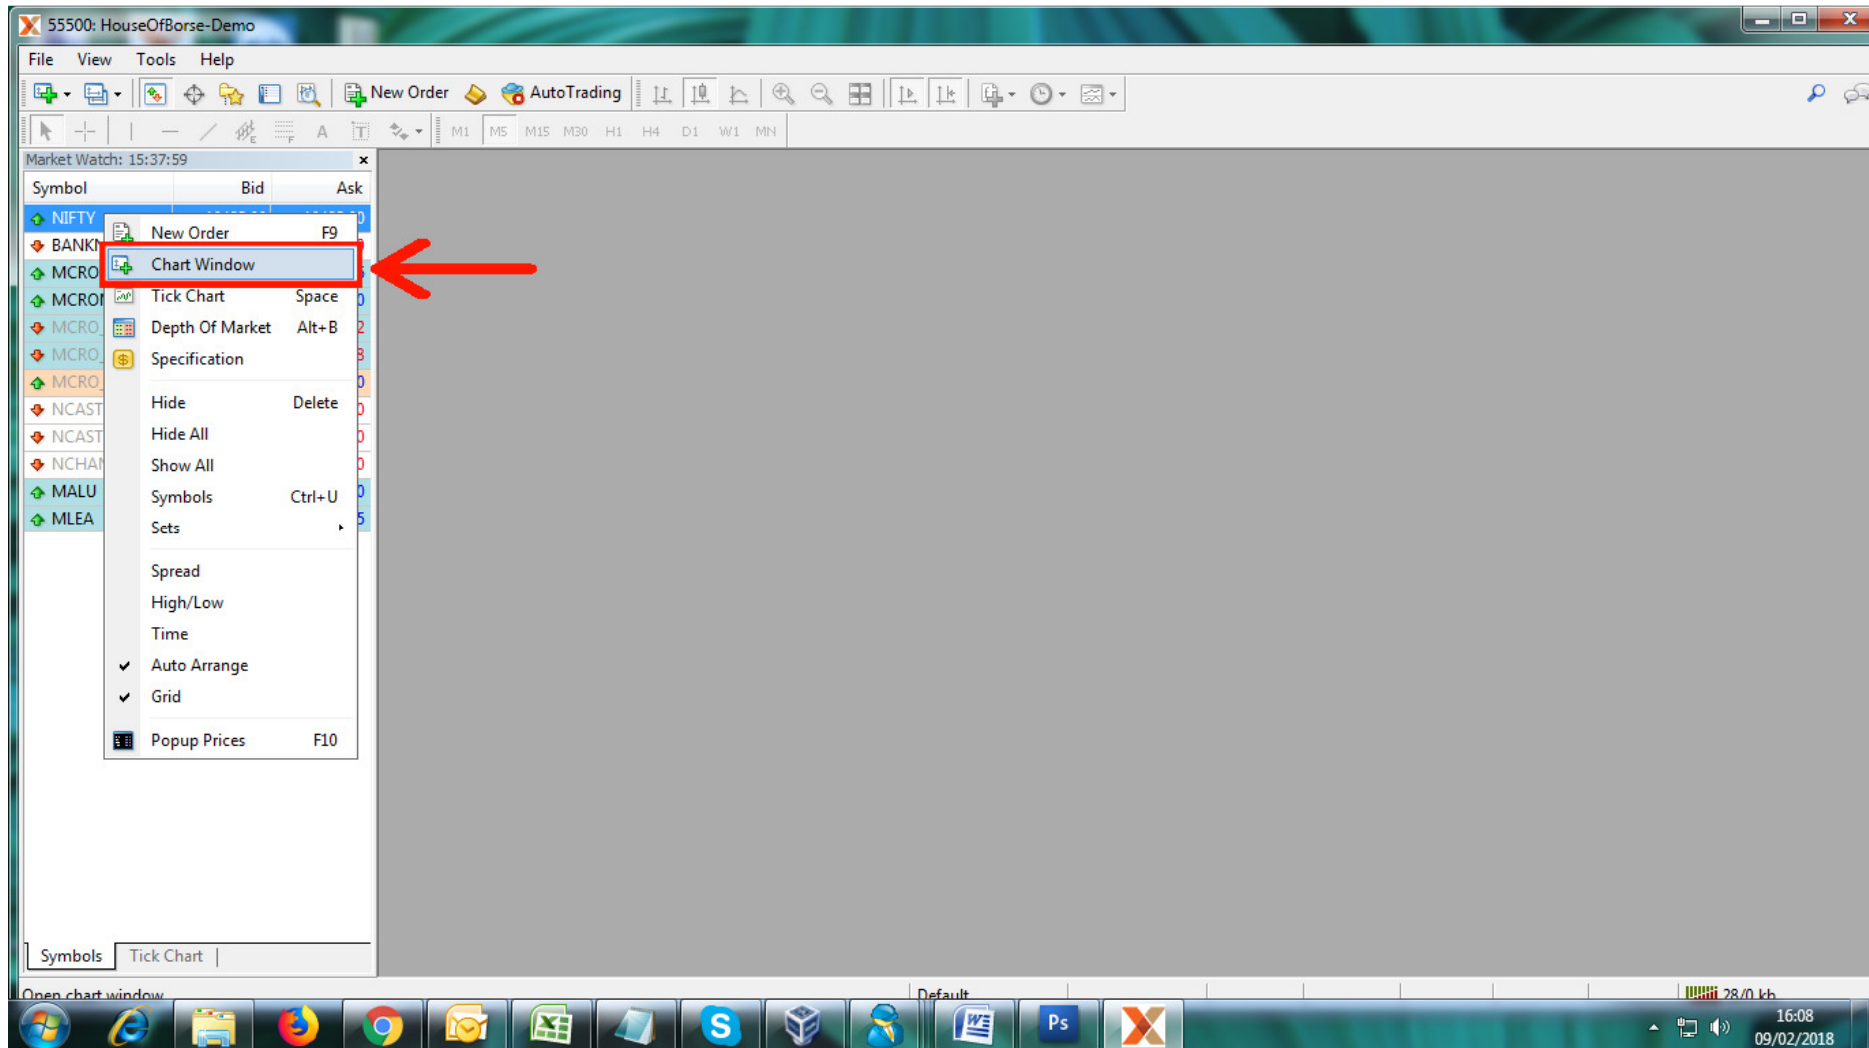

3. Select required Metatrader4 and click Next

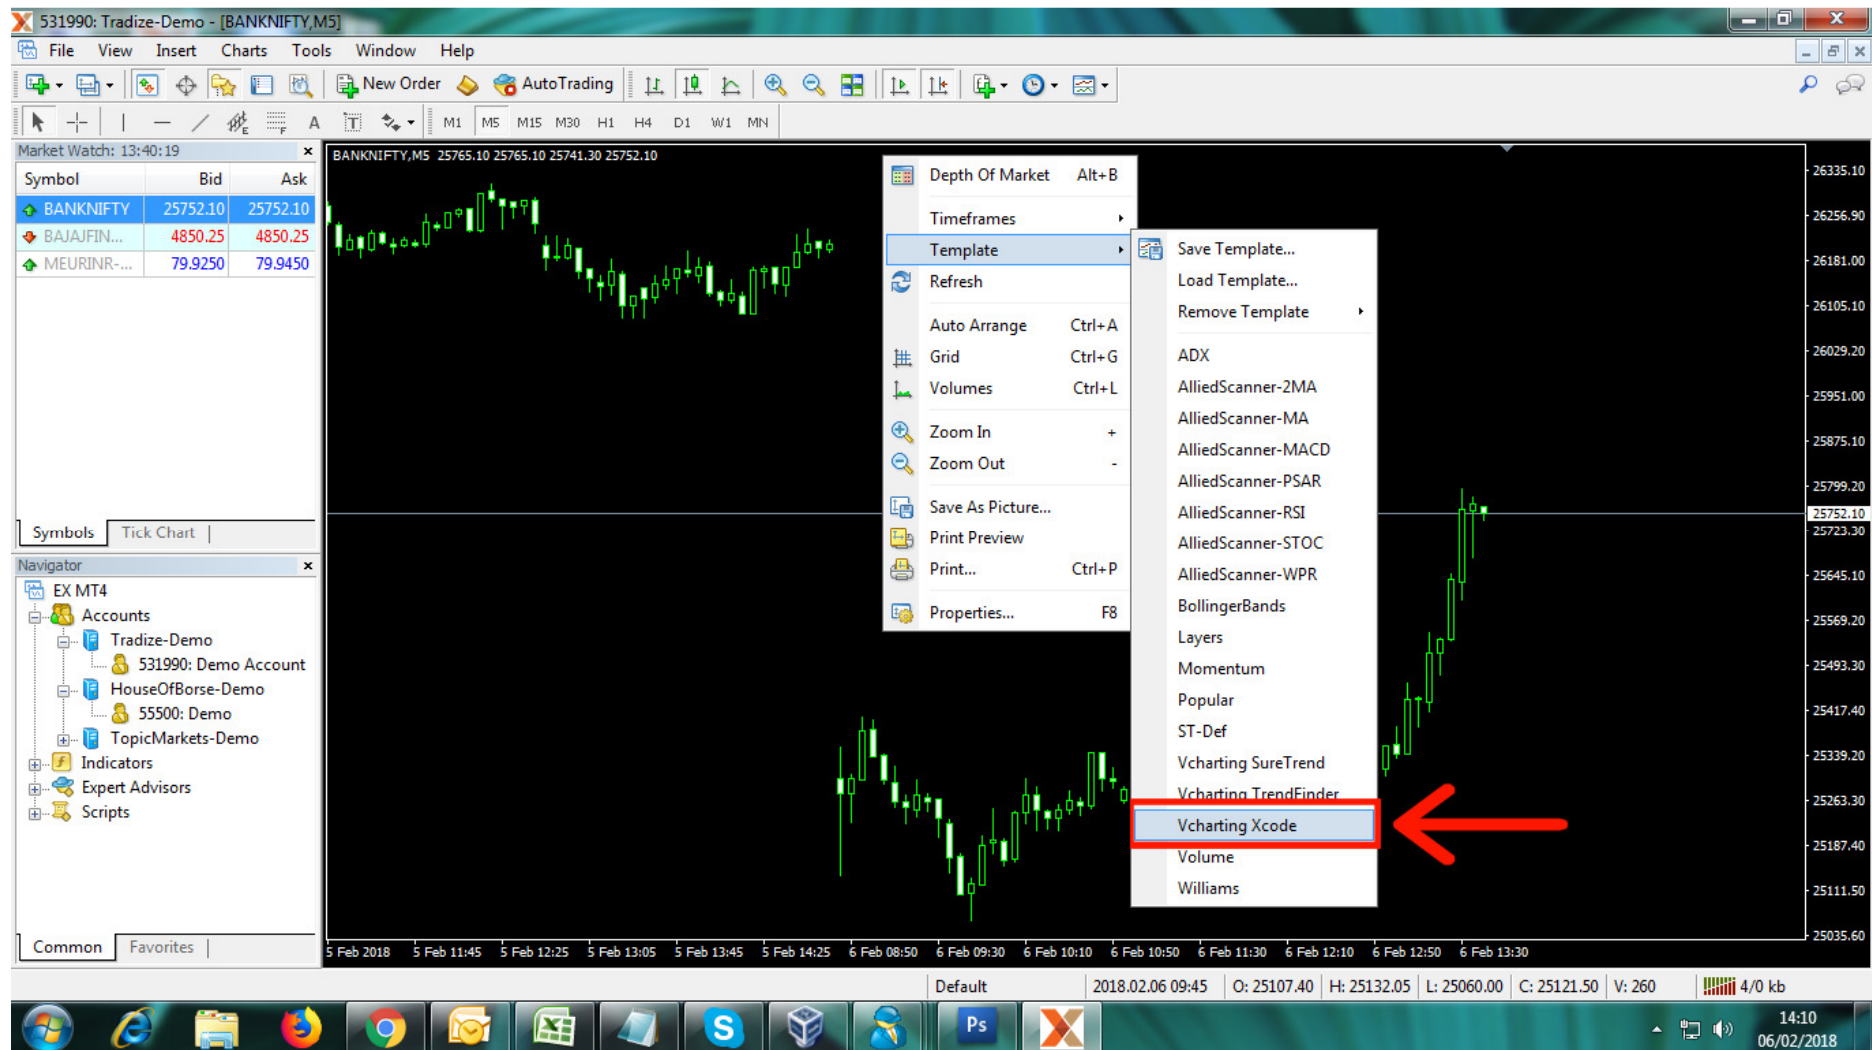

4. Once installed, open Metatrader4.

5. Right click any symbol in market watch and then click on “Chart Window” to open the chart for that symbol.

6. Right click on open chart. Put cursor on Template. Click on template named "Vcharting Xcode".

7. Indicator “Vcharting Xcode” will be applied to the chart.
